Examples of IAC Values for Freight and Passenger Trains

In order to provide an easy method for assessing the IAC determined on the basis of the calculation methodology in force, there are presented below some graphic examples for the calculation for the two types of traffic (freight and passenger), depending on:

- gross tonnage per train
 - from 60 to 3000 gross tons/train for freight trains
 - from 60 to 600 gross tons/train for passenger trains

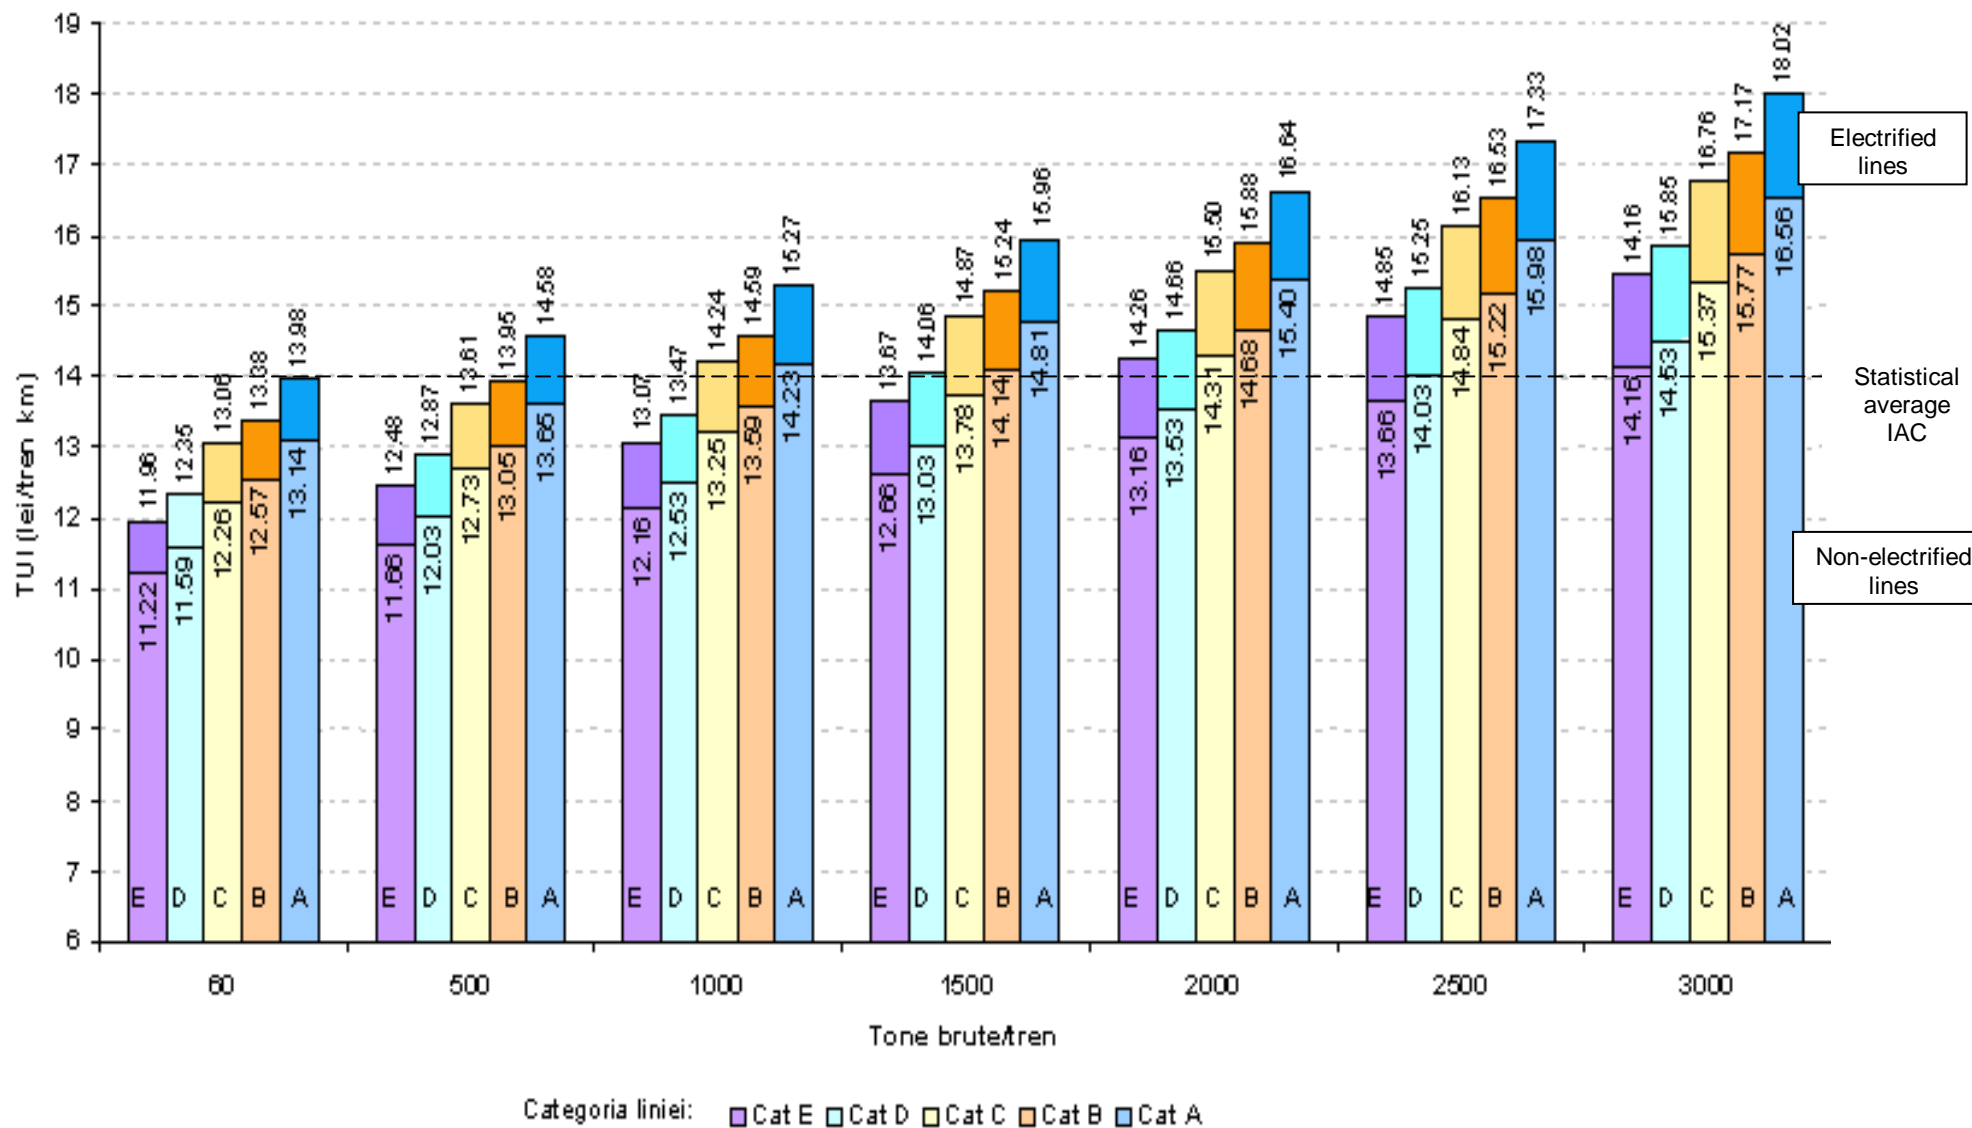

- line category
 - from A to E for freight trains
 - from A to D for passenger trains

- existence of the electrification system
 - electrified lines
 - non-electrified lines

Noua metodologie

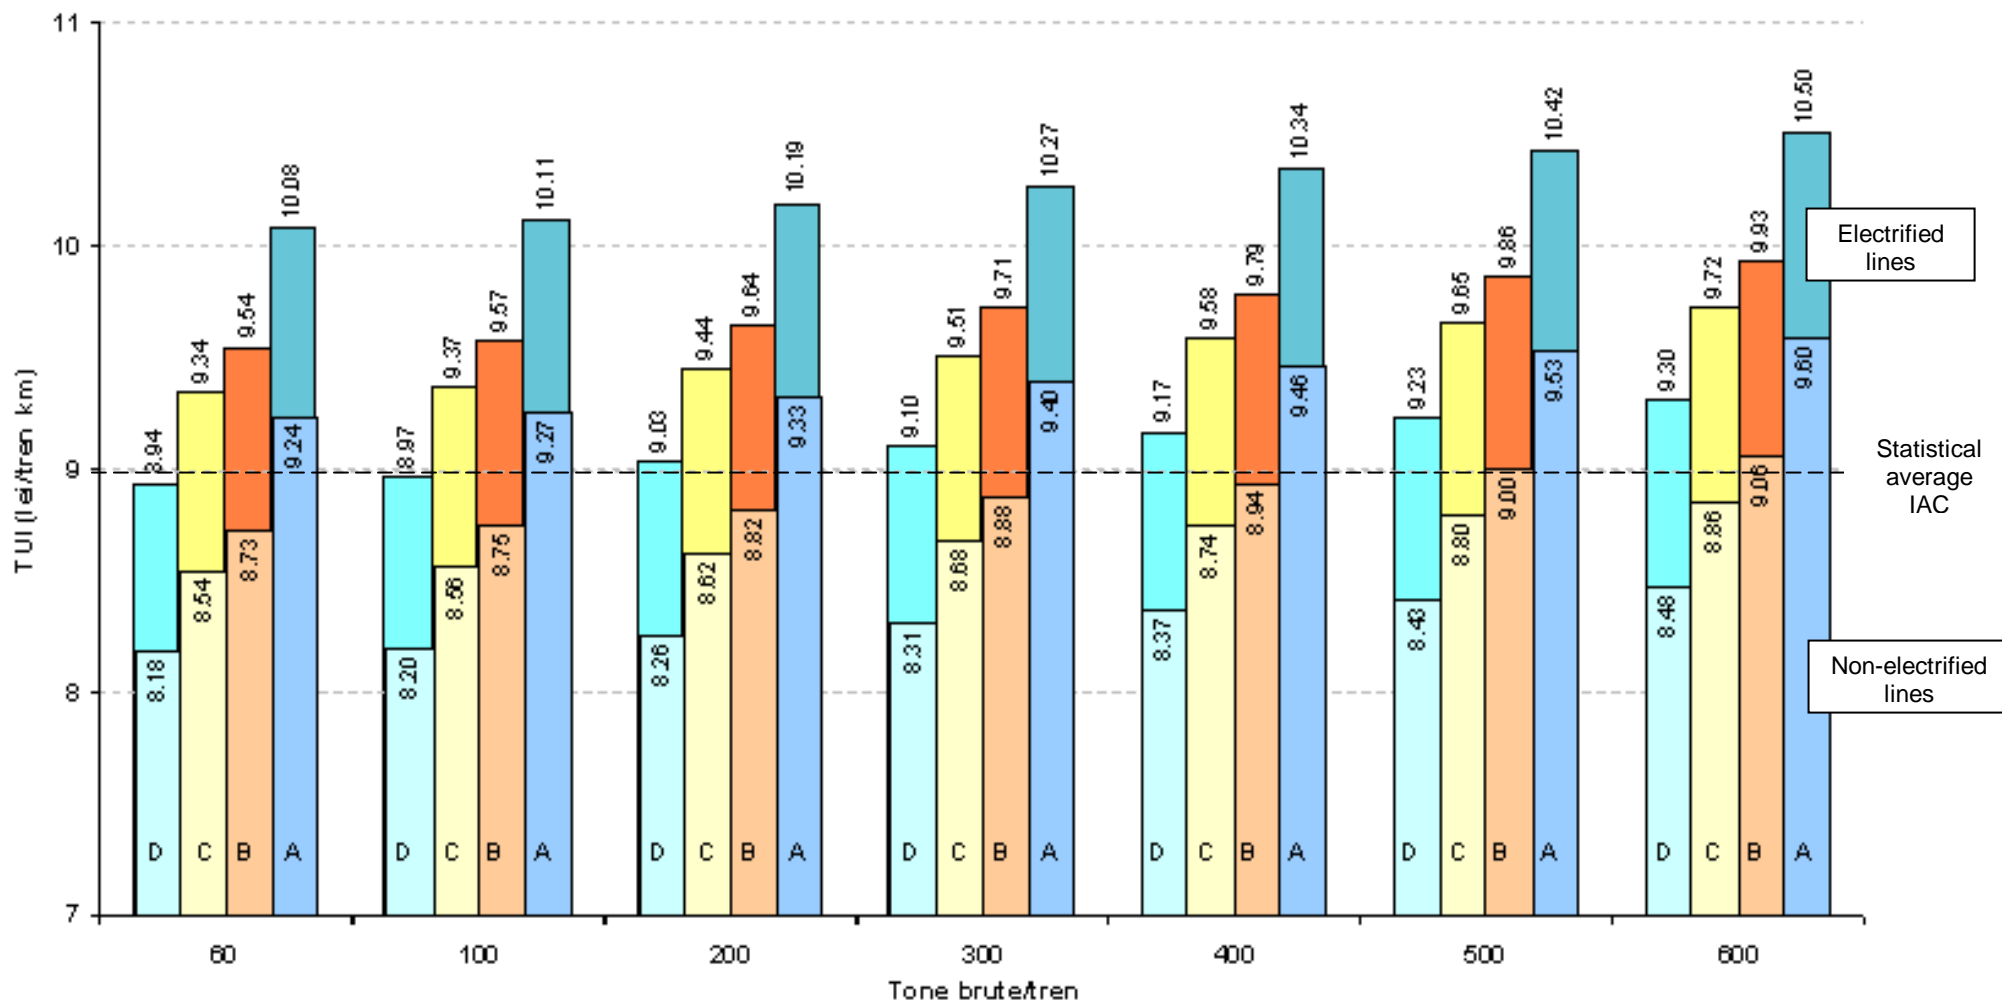

Variatia TUI in functie de tonaj
(trafic de marfa - linii neelectrificate si linii electrificate)

Noua metodologie

Variatia TUI in functie de tonaj
(trafic de calatori - linii neelectrificate si linii electrificate)

Categoria liniei:

□ Cat D □ Cat C □ Cat B □ Cat A
