SIMERIA
CURTICI
Sol vegetal
Legend soil
Praf argilos-nisipos, cafeniu
Fine-silty sand, of brown colour
Pietris în amestec cu nisip neuniform
Gravel mixed with uneven sand
Conglomerat constituit din prof argilos, cenusiu-albicios, în amestec cu fragmente de roca, plastic vartos
Conglomerate formed of grey-whitish clayey dust, mixed with fragments of rock
Roca fisurata, de la 10.80m compacta tare
Fissure rock, starting from 10.80m hard compacted
Beton de egalizare
Lean concrete 20cm
Drenaj
Drainage
Geotesut
Geotextile
Strat de pietris
Gravel layer
Strat de nisip
Sand layer
Strat de piatra sparta
Crushed stone layer
Strat de balast
Ballast layer
Strat de asfalt
Asphalt layer
Sol vegetal
Legend soil
Praf argilos-nisipos, cafeniu
Fine-silty sand, of brown colour
Nisip mic, cafeniu galbui
Small-size sand, of brown-yellow color
Pietris în amestec cu nisip neuniform
Gravel mixed with uneven sand
Conglomerat constituit din prof argilos, cenusiu-albicios, în amestec cu fragmente de roca
Conglomerate formed of grey-whitish clayey dust, mixed with fragments of rock
Roca fisurata, de la 13.20m compacta tare
Fissure rock, starting from 13.20m hard compacted
Nisip mic, cafeniu galbui
Small-size sand, of brown-yellow color
Nisip mare, galbui
Large sand, yellow
Nisip mic, cafeniu galbui
Small-size sand, of brown-yellow color
Pietris în amestec cu nisip neuniform
Gravel mixed with uneven sand
Conglomerat constituit din prof argilos, cenusiu-albicios, în amestec cu fragmente de roca
Conglomerate formed of grey-whitish clayey dust, mixed with fragments of rock
Roca fisurata, de la 13.20m compacta tare
Fissure rock, starting from 13.20m hard compacted
Roca compacta
Compacted rock
Roca fisurata
Fissure rock
Roca fisurata, de la 13.20m compacta tare
Fissure rock, starting from 13.20m hard compacted
Roca fisurata, de la 13.20m compacta tare
Fissure rock, starting from 13.20m hard compacted
