NOTA / NOTE 1:

Pe baza planului de amplasament al liniei de cale ferată, s-a realizat proiectul de amplasament al liniei de cale ferată în zona industrială de lângă stația de cale ferată "Zona Industrială".

The earth ground, will be filled with vertical electrodes until 100cm deep.

For the location and positioning of all the elements related to the present drawing will be read together with the project design.

The excavation works for the undercrossing, as well as those for the underground works for the other elements, shall be carried out in accordance with the project design.

The contractor shall be responsible for the coordination of the site with regard to any error or incongruity encountered, otherwise the contractor will be responsible for it.
