NOTA:
 In situatia demontarii prefabricatorilor din zona linie pentru executarea lucrarilor la linie cu masini grele de cale se va aplica urmatoarea tehnologie:
 Se decoperteaza astiutii in zona monolitizati dintre prefabricate (DP1)
 Se demoleaza betonul de monolitizare
 Se taie armaturile in zona centralea a monolitizarii (la min.1.50m de la marginea peronului)
 Se demontaza prefabricatele si se pozitioneaza in aceeasi sectiune pe exteriorul peronului (prefabricatul demontat se depoziteaza pe cel care nu se demonteaza)
 Se executa lucrari la cale
 Se refaca peronul prin montarea prefabricatorilor prefabricatorilor pe pozitia initiala
 Pe masura ce se monteaza elementele prefabricate de peron se asigura continuitatea armaturilor, taiate in faza 3, cu eclise din Bst500 Ø10mm l=250mm sudate
 Se monolitizeaza cu beton C30/37 zona demolata si se refaca asfaltul decopertat.

NOTE:
 The following technology will be applied in case when the prefabricated elements from the line will be removed in order to execute the line works with heavy track machines:
 The asphalt uncovering in the concrete cast in position area between prefabricated elements (DP1)
 Removing the cast-in-place concrete
 Cutting the reinforcements in the central area of the concrete cast in position (at min. 1.50 m from the platform edge)
 Removing the prefabricated elements and storing them in the same section on the platform exterior side (the removed prefabricated unit is stored on the one which is not removed)
 Track works execution
 Renewing the platform by mounting prefabricated elements on the initial position
 While mounting the prefabricated elements on the platform it is ensured the continuity of reinforcement cut were cut at point 3, by help of Bst500 welded fishplates having Ø 10mm and l = 250 mm
 The removed area is casted-in-place with concrete C 30/37 and the uncovered asphalt is renewed.

NOTA GENERALA VALABILA PENTRU INTREGUL PROIECT:
 Executantul este obligat sa verifice informatiile din planuri si din extrasele de materiale inainte de comanda oficerului si sa comunice orice neconcordanta proiectantului. In caz contrar proiectantul nu isi va asuma responsabilitatea pentru nici o eroare din planuri sau din extrasele de materiale.

UNIVERSAL REMARK VALID FOR THE ENTIRE PROJECT:
 The executants is bound to verify all the information from the plans and from the material lists before ordering any materials and to communicate any disparity to the designer. Other way the designer will not assume the responsibility about the errors in the plans or in the material lists.
